Blessings

India has been the leading country in the world in knowledge, wisdom, literature, music, art and culture from the very beginning.

Philosopher travellers from across the world visited India from time to time to gain knowledge of its religion, philosophy, literature, medicine, astronomy, astrology and mathematics from its sacred texts. Up to the 18th century India had been an ideal country in the world in educational, economic, social and spiritual fields. In the 18th century, our contribution to the world market was 37% and our income was 27% of the total income of the world. The literacy rate in the country was 97%.

According to the famous German scholar Max Muller, English scholar G.W. Leitner and the then British Government, the number of primary and secondary Gurukuls was 7 lac 32 thousand. The centres of higher education were 14 thousand where at least 18 subjects ranging from Mathematics, Astronomy, Astrophysics, Physics, Chemistry, Geology, Metallurgy Philosophy, Surgery and Medical Science, Technology and Management were taught. The British rulers, having a hidden agenda to keep us enslaved for centuries, tried to ruin our rich and prestigious tradition of wisdom by destroying our whole educational system.

Many institutes of science, management and technology exist in the country but we are not able to inculcate our tradition and culture amongst the students. We want to make our culture, sanskaras, history, yoga, meditation and good values a part of today's education system. We want to Indianise it. By awakening the hidden great self and by developing the holistic personality of the student we want to groom him/her to become the most successful, greatest, fully awakened, able, industrious and ideal human being of the world.

Through the University of Patanjali and Acharyakulam we want to create an example by setting up such a tradition of Vaidic Rishi Sanskriti and Gurukuliya parampara that after Deekshant, Graduates of our institute will not be roaming here and there in search of job at the mercy of others rather they themselves will provide health, self dependence and employment by creating job opportunities for others.

We want to build up such a foundation of sanskaras in the children of Acharyakulam that, be it the University of Patanjali or any other institute in the world, wherever they go they will not be influenced by the sensual materialism of the West. Rather we want to prepare such fully awakened and conscious children who will be able to change the course of flow of the current times.

- Pujya Swami Ramdevji Maharaj

Blessings

Children are the future of any nation and are at the centre of the dreams and aspirations of the parents. Parents wish to see their children achieve great heights. They aspire to give their children the best of education and the best of values. 'Acharyakulam' is the confluence of ancient Vaidic learning and the best of modern education. We wish to bring out leaders with high moral values along with the best of modern education through Acharyakulam.

The leaders of our Nation used to be nurtured in the Gurukulas in the earlier times, where pupils used to study the Veda-Vedangas along with the art of defence, economics & virtues and thereby gain the ability of critical thinking of what was right and what was wrong. Hence true, austere and self-disciplined people held the supreme place amongst individuals, family, society and Nation. Unfortunately today's leaders of our country are being groomed in Convent Schools and foreign institutions like Oxford, Cambridge, Harvard and Massachusetts. We have to prepare social, cultural, spiritual, economical, industrial, political, scientific & intellectual leadership through Acharyakulam and other erudite programmes. Unfortunately, in today's experts, leaders & intelligentsia feelings and values of spirituality, Bhartiyata (Indianness) and self esteem are withering on the vine. We will groom up such leadership tinged with spirituality. Bhartiyata and self esteem who will have the amalgamation of modernization and Bhartiyata

Acharyakulam shall play a pivotal role in nurturing superior and awakened citizens.

I heartily wish all the Children, Parents and Guardians a successful, prosperous and pious life ahead.

Pujya Acharya Balkrishnaji Maharaj

INTRODUCTION

With the divine blessing and guidance of Param Pujya Yogrishi Swami Ramdevji and Pujya Acharya Balkrishnaji, an innovative vision in the field of value based education. 'Acharyakulam' has been set up. It is the divine confidence of the age old tradition of imparting wisdom and knowledge in the ancient Gurukulams by our ancestral Rishis & Munies and the modern Scientific, Professional and IT enabled education system of today.

VISION OF ACHARYAKULAM

Mission:

To groom fully awakened and fully abled souls who will build an awakened, enlightened, developed, family, who in return will enhance the physical, mental, intellectual, spiritual, social, economical, political and scientific society that will enrich the nation and then the world.

Objectives of Acharyakulam

1. To prepare Vedic scholars- To prepare proven scholars in Grammar, Philosophy, Upanishad, Veda, Vedic literature, Vedic Mathematics, Indian proven history and Raj Dharma etc and to prepare graduates with the power to give social, spiritual, economical, scientific and political ideal leadership.
2. To prepare leaders of Modern Bharata-To prepare intellectuals and national leaders who can set new landmarks in different fields like: Technology, Management, Defence, Administrative Services, Police Services, Medicine, Engineering, Games and Sports, Fine Arts, Music, Drama, Agriculture, Industry, Research, etc.

We will be instilling in the young minds the glory, utility and attraction of both the expectations. Then a child will get prepared according to his/her Karmashaya, Sanskar and Svabhava. Pujya Swamiji believes that the possibility of reformation in a child decreases by one percent with every passing year of age. And generally from every aspect a child becomes enlightened by one percent every year. But with the help of intellectual efforts we can develop this enlightenment physically, intellectually and spiritually by one to ten percent.

Expected behaviour of the members of Acharyakulam family

1. Aspect of Knowledge-To enhance intellectual development of a child is our primary goal.
2. Aspect of Behaviour- To ensure that a child remains 100% free from macro behavioural vices. And being aware of the micro vices, he/she endeavours with full determination and honesty to get rid of the same so that we can take pride in saying, "We, at Acharyakulam are following the path of our ancestors." All Acharyas and scholars are expected to have the attitude and values as expected from ideal angels, children of Rishi-Rishikas, Veer-Veeranganas and the greatest children of Bharatmata. We should have a strong morale against unethical conduct. We should have the same hatred against the micro vices like desire, despair, insistence, impulse, reaction, etc. as we have against macro vices like non vegetarian diet, malpractices, depravity, violence, addiction, etc. We should not welcome any unethical conduct, though it is true that our Sanskaras and Karmashaya instilled in our soul from previous lives and our attitude and nature of the present life will stand as the biggest challenges in front of us. However, with awakened consciousness, firm determination and enthusiasm and with practice of yoga, devotion and such other methods we can come out of such difficulties and make our evil sanskaras ineffective.

SALIENT FEATURES

1. As the pathfinder of a different education system, Acharyakulam integrates the eternal and sacred heritage of oral Vaidic learning along with the latest developments in modern education in a world class learning ambience, facilitated with the best hi-tech multimedia learning tools with NCERT syllabus.
2. As a part of traditional Vaidic Gurukul system, the children master the subjects ranging from Sanskrit, Veda-Vedangas, Upanishad, Vaidic Mathematics, Philosophy, etc. Same way as part of Modern Education, they also develop proficiency in English language, English conversation, Mathematics, Science, Social Studies, Art & Craft, Sports, etc. However, inculcating Vaidic Culture, Ethics and Sanskaras lies at the centre of the whole concept.

3. Multifaceted and Comprehensive development of the individual's personality is the objective of Education. A truly holistic development - i.e. the development of physical, intellectual, spiritual and emotional faculties of a child is the goal here at Acharyakulam and regular practice of Yoga and Havan by the whole of its family plays a significant role to achieve this goal.

4. As part of Rishi tradition of our country, all the Rishiputras & Rishikanyas of Acharyakulam have their Upnayan Sanskar before Vedarambh.

5. Acharyakulam is a confluence of the best of the Eastern and the Western systems and concepts of Education.

6. With special emphasis on spirituality and character building, Acharyakulam has been established as the breeding ground for Social and National leaders of tomorrow.

7. To inculcate the indomitable love for the Motherland and the Mother Nature the young children here are taught how to follow. Swadeshi way of life based on Yoga and Ayurveda with satvik and nutritious food.

8. The institution always encourages innovative & creative programmes.

TEACHER ORIENTATION PROGRAMME

As part of our innovative and sincere approach towards inclusive education, we consider it as our great and noble duty to delve deep into the problems of a child, discover root causes of the problems and help the young children grow up as better and responsible citizens. Thus to enhance the teacher's skills and know-how, Teacher Orientation Programmes are organised in the school hiring highly experienced resource persons dealing with Learning Disability and the Behavioural traits. Resource persons are also hired to conduct different interactive sessions for the teachers. In this way innovative or newly developed teaching methods are taught to the teachers in order to make the teaching-learning process more attractive and comprehensible to the students.

SMART CLASSES

In order to remove the monotony of the classroom modern teaching appliances are used by the teachers. Smart Boards will be used to make the teaching learning process enjoyable and interesting to the students. Method of learning is being transformed very fast from instructive approach to a constructive one where teaching becomes lively with the help of models, charts and other teaching aids.

PREPARATORY/EXTRA CLASSES

The school runs preparatory/extra classes for all the students dividing them into different groups as per level of the children in different subjects. Special preparatory classes are also arranged on a regular basis for the students not placed in an advantageous situation.

SCHOOL CALENDER

The school calender gives the chronology of the activities and the functions to be held in the school in an academic session. The parents, therefore, are supposed to be well aware of the activities and the functions which are to take place. Though, all sincere efforts are made to adhere to the calender but it is subject to change.

GAMES AND SPORTS

The school pays maximum interest in the field of games and sports. We have a grassy football ground, volleyball and badminton court. Indoor games like chess, carrom, etc enable the student to acquire different skills. Children are encouraged to participate in all the sports activities.

FACULTY

Great importance is attached to the quality of the staff of Acharyakulam. Trained, highly qualified and experienced teachers are appointed to impart education. Compassion, devotion to duties, good manners, helpfulness, dedication and strong belief in spiritualism are some of the prerequisites of teachers at Acharyakulam. Enhancement of teachers' skills is a constant phenomenon here. The teachers' interact with the students to give them the much needed academic and emotional support to make them feel at home.

CO-CURRICULAR ACTIVITIES

Although excellence in academics is the cornerstone of child development at Acharyakulam. Due importance attached to an all-round emancipation through various co-curricular activities. Activities such as debate, quiz, declamation, mono acting, music, dance, dramatics etc. form part of the school curriculum. Environmental awareness, love for nature and concern for fellow human beings are taught to students by participation in various hand-on projects.

A sense of healthy competition always brings out the inherent qualities in a child. The whole students' body of the school is divided into four houses viz. Prithvi, Ojas, Tejas & Vayu. Inter house activities are organised periodically to instill a sense of healthy competition among children. These events help to improve qualities of reasoning, leadership, compassion and creativity to flourish in young minds.
